

Automatic Screw Feeder

Automatic screw-counting feeder. FM²-36 series

Applicable screw diameters: M3~M6
Screw hopper capacity: 150cc

Add screws to the hopper, set the number desired and it supplies them accurately. Saves time and prevents mistakes. This feeder helps maintain constant productivity.

High Quality!

Set the number of screws desired and the feeder delivers them precisely.

- Continuous screw aligning onto the rail without interruption or jamming up.
- Screw hopper capacity is 150cc.
- Batch/screw-counter supplies desired number of screws.
- The FME-type in this series is computer and sequencer compatible.

Japan Quality since 1968

OHTAKE- ROOT KOGYO CO., LTD (Ichinoseki, Iwate, JPN) is an authorized manufacturer of medical equipment. In keeping with its proud tradition of Japan quality, these screw feeders are produced in the same factory authorized to manufacture medical equipment and have sold up to 20,000 units per year in 30 countries worldwide. These durable feeders can be adapted to accept various types of screws and are easy to maintain.

Automatic screw-counting feeder.FM²-36 series

- **Continuous screw aligning onto the rail.**
The horizontal rail prevents the jamming of screws.
- **Hopper capacity is 150cc.**
The hopper capacity is 150cc. This capacity may be increased by using the Nejikura-series hoppers.
- **Batch/screw counter supplies desired number of batches and screws.**
The counter can be set from 1~99. It counts and ejects precisely.
- **Sequencer and PC-compatible models available.**
The FME type feeder in this series is a compatible model for PROFI BUS/PC.

Specifications

Size : W131×D255×H200mm
Weight : approx. 6kgs
Power Source :
AC adapter • 100V-240V
Body • DC15V 1A
Applicable screw :
Diameters • M3 ~ M6
Length • up to 25mm (excl. head)
Hopper capacity : 150cc

※Specification options are available.

[Caution]

- The specification and performance values, in this catalog, are based on the design calculations, factory tests, individual performance evaluations, results from product use, as well as official specifications. These values are useful for determining the type of machine required for various working conditions.
- The specifications, described in this catalog, may be altered, without notice, whenever there are amendments, improvements or changes in the design.
- It is the user's responsibility, when operating this machine in conditions other than recommended or in unusual situations, to contact us for advice, verification or evaluation.
- For your safety, please read the instruction manual before operating this machine.
